Morocco, Western Sahara, Algeria, Tunisia,
Libya, Egypt, Scale 1:1.000.000

AERONAUTICAL DIGITAL VFR CHARTS

Rogers Data provides ICAO VFR charts for almost every country in Europe - same map image, content and quality.

Rogers Data ICAO VFR charts from north to south, from east to west. From one country to the next within Europe and beyond. We also offer VFR charts beyond the borders of Europe - for countries in the Middle East, like Türkiye, Saudi Arabia, the United Arab Emirates, Qatar and Bahrain (scale 1:1.000.000) and for countries in North Africa like Morocco, Western Sahara, Algeria, Tunisia, Libya and Egypt. All Rogers Data VFR ICAO charts have the same map image, the same content and the same quality. This makes it easy to fly across borders - once you get used to the map image of Rogers Data you can get anywhere within Europe and beyond.

Rogers Data VFR ICAO charts are available as digital charts from market-leading and popular aeronautical navigation app- and software providers as well as for build-in navigation devices (GeoTiffs).

All **Rogers Data** VFR ICAO charts are available with the current edition at the beginning of the flying season, normally at the end of March / beginning of April of each year.

Rogers Data provides updates for all digital charts during the flying season, if there are significant changes in airspace structure.

Rogers Data VFR ICAO charts have a high-quality topographic map with shading and relief and uses a very detailed representation of ATS airspace structures. They are perfect for professional use.

Rogers Data VFR ICAO charts have colored altitude layers with contour lines (so-called hypsometric tints). The result is an outstanding chart image, especially in mountainous regions.

Coverage 1:200.000, Austria, Slovenia & Croatia

Coverage 1:1.000.000, Türkiye, Saudi Arabia, U.A.E., Bahrain & Qatar
